

Please reject NAB's petition 04-160. I can see no problem with XM providing traffic and weather. I listen to both AM and XM daily, and I find that I obtain information regarding traffic and weather from both sources. I rely on AM for more local and in-depth information, while XM gives me broad conditions almost instantly.

I can not understand how preventing XM from providing traffic and weather services ADDS to competition. Rather, this petitions appears to be the very opposite and to be anti-competitive. I want MORE options, not fewer.

Very respectfully,
Joseph Huang
